Check assessment and learning outcome alignment

Assessment

ASSESSMENT ONE-PAGE PRACTICAL GUIDE

WHAT IS THIS FOR?

Keep the challenge that belongs to the discipline and remove task demands that are not part of the intended capability.

WHY DOES IT MATTER?

Keep the challenge that belongs to the discipline and remove task demands that are not part of the intended capability.

WHAT DOES THIS LOOK LIKE?

Each task has a clear purpose, and its format and criteria point directly back to the learning outcomes it is meant to assess.

WHAT CAN I DO?

- Write down the exact learning outcome being assessed.
- List everything the task requires students to do to demonstrate it.
- Circle requirements that are genuinely part of the outcome; question the rest.
- Check that the rubric rewards the intended capability rather than polish, speed, confidence or familiarity.

EXAMPLE IN PRACTICE

A course discovers that a highly polished oral presentation is affecting marks even though oral performance is not an outcome, so the task is redesigned around the actual analysis being assessed.

STARTING POINT TO ADAPT

For the next teaching period, our team will: write down the exact learning outcome being assessed; list everything the task requires students to do to demonstrate it. We will review student feedback and adjust if needed.
