Build common adjustments into course design

Curriculum and program design

WHAT IS THIS FOR?

Turn frequently requested individual adjustments into ordinary course features where the learning outcomes allow.

WHY DOES IT MATTER?

Turn frequently requested individual adjustments into ordinary course features where the learning outcomes allow.

WHAT DOES THIS LOOK LIKE?

Recurring supports are built into the course from the start so students do not need to repeatedly disclose or negotiate for them.

WHAT CAN I DO?

- Look at the adjustments students request most often.
- Separate supports that can be available to everyone from genuinely individual needs.
- Build common access routes into the default course design.
- Make the remaining individual support pathway easy to find and use.

EXAMPLE IN PRACTICE

A course makes recordings, transcripts, accessible notes and a clear re-entry pathway standard rather than waiting for students to request them.

STARTING POINT TO ADAPT

For the next teaching period, our team will: look at the adjustments students request most often; separate supports that can be available to everyone from genuinely individual needs. We will review student feedback and adjust if needed.
