Check workload, timing and hidden costs

Curriculum and program design

WHAT IS THIS FOR?

Find course features that make participation harder because of time, money, travel or competing responsibilities rather than academic capability.

WHY DOES IT MATTER?

Find course features that make participation harder because of time, money, travel or competing responsibilities rather than academic capability.

WHAT DOES THIS LOOK LIKE?

The real time, cost and participation demands of the course are visible, and avoidable barriers are reduced.

WHAT CAN I DO?

- Map the real weekly workload, including peaks and compulsory activities.
- List costs beyond tuition: software, transport, materials, uniforms or unpaid time.
- Check whether part-time or interrupted study remains coherent.
- Move information about unavoidable commitments and costs as early as possible.

EXAMPLE IN PRACTICE

A course reduces campus attendance across multiple days, flags material costs before enrolment and publishes the full semester map early.

STARTING POINT TO ADAPT

For the next teaching period, our team will: map the real weekly workload, including peaks and compulsory activities; list costs beyond tuition: software, transport, materials, uniforms or unpaid time. We will review student feedback and adjust if needed.
