Run an inclusive course check

Curriculum and program design

WHAT IS THIS FOR?

Use a short scan to find the most obvious inclusion barriers before you begin a deeper review.

WHY DOES IT MATTER?

Use a short scan to find the most obvious inclusion barriers before you begin a deeper review.

WHAT DOES THIS LOOK LIKE?

A short review identifies obvious barriers across access, representation, flexibility and expectations before a deeper redesign.

WHAT CAN I DO?

- Check who and what is represented across the course.
- Check whether time, cost and scheduling assume an “ideal” student.
- Check whether materials and environments are accessible by default.
- Check what students are expected to know that the course never explicitly teaches.

EXAMPLE IN PRACTICE

A course team uses the four framework areas in a 30-minute planning meeting and identifies one practical change under each area before semester starts.

STARTING POINT TO ADAPT

For the next teaching period, our team will: check who and what is represented across the course; check whether time, cost and scheduling assume an “ideal” student. We will review student feedback and adjust if needed.
