Check representation across your course

Curriculum and program design

WHAT IS THIS FOR?

Look beyond a single “diversity week” and check who is visible as an ordinary knowledge-maker, practitioner and possible future.

WHY DOES IT MATTER?

Look beyond a single “diversity week” and check who is visible as an ordinary knowledge-maker, practitioner and possible future.

WHAT DOES THIS LOOK LIKE?

Knowledge, examples, cases and professional futures reflect a wider range of people and perspectives across the whole course.

WHAT CAN I DO?

- Scan readings, cases, examples and speakers across the whole semester.
- Notice which groups appear only as problems, patients, clients or disadvantaged populations.
- Add credible disciplinary and community voices where perspectives are narrow.
- Check that representation is connected to core disciplinary questions rather than token content.

EXAMPLE IN PRACTICE

A first-year course maps every author, case and guest speaker, then broadens the set of voices students encounter as ordinary disciplinary expertise.

STARTING POINT TO ADAPT

For the next teaching period, our team will: scan readings, cases, examples and speakers across the whole semester; notice which groups appear only as problems, patients, clients or disadvantaged populations. We will review student feedback and adjust if needed.
