Make live teaching easier to follow

Teaching

TEACHING ONE-PAGE PRACTICAL GUIDE

WHAT IS THIS FOR?

Reduce avoidable cognitive and sensory load while keeping the disciplinary complexity that matters.

WHY DOES IT MATTER?

Reduce avoidable cognitive and sensory load while keeping the disciplinary complexity that matters.

WHAT DOES THIS LOOK LIKE?

Students can follow the structure of a class, process key information in more than one way and revisit important content where needed.

WHAT CAN I DO?

- Chunk complex explanations and clearly signpost transitions.
- Describe essential visuals and provide accessible source materials.
- Pause after dense ideas so students can process before moving on.
- Release key materials early enough for students who need preparation time.

EXAMPLE IN PRACTICE

A lecturer explains a complex diagram verbally, provides an accessible digital version and pauses between stages of the walkthrough.

STARTING POINT TO ADAPT

For the next teaching period, our team will: chunk complex explanations and clearly signpost transitions; describe essential visuals and provide accessible source materials. We will review student feedback and adjust if needed.
