Accessible assessment materials and criteria

Are my assessment criteria and materials accessible?

ACCESSIBILITY / ASSESSMENT

ONE-PAGE TEACHING GUIDE

WHAT IS IT?

Materials and marking criteria are accessible by design, with criterion explained in eLearning tool pilots

WHY DOES IT MATTER?

Accessibility is about usability, not just technical availability. A resource, room or activity can exist while still costing some students far more energy to perceive, navigate, understand or act on. Repeated friction sends a message about who the default user is.

THE STUDENT EXPERIENCE

- “The information exists, but finding and using it takes more effort than learning it.”
- “I have to keep asking for a version I can actually use.”

HOW CAN I DO IT?

- Check rubrics, exemplars and task sheets for clarity and accessibility.
- Explain the criteria in class or through an accessible walkthrough.
- Pilot or test tools before use, especially if they introduce navigation barriers.

EXAMPLE IN PRACTICE

An educator records a short rubric walkthrough so students can hear and see what each criterion means before they submit.

STARTING POINT TO ADAPT

For this assessment, we aim to make assessment instructions, criteria and supporting materials usable with assistive technologies and accessible formats. The learning outcomes being assessed are [insert outcomes].
