Accessible feedback formats

Can students access feedback in different ways?

WHAT IS IT?

Multiple means of accessing feedback let students act on it in a mode that works

WHY DOES IT MATTER?

Accessibility is about usability, not just technical availability. A resource, room or activity can exist while still costing some students far more energy to perceive, navigate, understand or act on. Repeated friction sends a message about who the default user is.

THE STUDENT EXPERIENCE

- “The information exists, but finding and using it takes more effort than learning it.”
- “I have to keep asking for a version I can actually use.”

HOW CAN I DO IT?

- Offer feedback in more than one mode where feasible, such as written comments plus an audio summary.
- Make feedback easy to find and return to.
- Ensure the mode supports the student to understand the next step.

EXAMPLE IN PRACTICE

A student can access short written comments, the completed rubric and an optional audio explanation of the major priorities for improvement.

STARTING POINT TO ADAPT

For this assessment, we aim to make feedback available in formats students can perceive, revisit and act on. The learning outcomes being assessed are [insert outcomes].
