Accessible learning materials and environments

Are my learning materials and environments accessible?

ACCESSIBILITY / CURRICULUM

ONE-PAGE TEACHING GUIDE

WHAT IS IT?

Materials and learning environments are designed for accessibility — physical access, captions, alt text, screen-reader compatibility

WHY DOES IT MATTER?

Accessibility is about usability, not just technical availability. A resource, room or activity can exist while still costing some students far more energy to perceive, navigate, understand or act on. Repeated friction sends a message about who the default user is.

THE STUDENT EXPERIENCE

- “The information exists, but finding and using it takes more effort than learning it.”
- “I have to keep asking for a version I can actually use.”

HOW CAN I DO IT?

- Adopt accessible document and media practices as standard workflow.
- Consider room layout, physical access, acoustics and technology at the planning stage.
- Treat accessibility as part of normal course design, not a separate afterthought.

EXAMPLE IN PRACTICE

A course uses accessible templates, captioned media, alt text and room booking checks before the semester begins.

STARTING POINT TO ADAPT

This course has been designed to provide learning materials and environments in accessible formats from the start. If you notice an avoidable barrier or an important perspective that is missing, tell us through…
