Prioritising essential course content

Is it clear what content is essential?

ACCESSIBILITY / CURRICULUM

ONE-PAGE TEACHING GUIDE

WHAT IS IT?

Course materials clearly distinguish essential from optional content, so students with limited time or energy can prioritise important content or activities

WHY DOES IT MATTER?

Accessibility is about usability, not just technical availability. A resource, room or activity can exist while still costing some students far more energy to perceive, navigate, understand or act on. Repeated friction sends a message about who the default user is.

THE STUDENT EXPERIENCE

- “The information exists, but finding and using it takes more effort than learning it.”
- “I have to keep asking for a version I can actually use.”

HOW CAN I DO IT?

- Label core tasks and readings clearly.
- Avoid making students guess what matters most.
- Use structure to help students re-enter after disruption.

EXAMPLE IN PRACTICE

Each weekly module lists “Start here”, “Essential”, and “Explore further”, helping students focus when time or energy is tight.

STARTING POINT TO ADAPT

This course has been designed to make it clear which course content is essential, recommended or optional. If you notice an avoidable barrier or an important perspective that is missing, tell us through [contact/channel] so…
