Multimodal teaching

Do I teach in more than one mode?

WHAT IS IT?

Multimodal delivery is routine: spoken explanation accompanies visuals, recordings are captioned

WHY DOES IT MATTER?

Accessibility is about usability, not just technical availability. A resource, room or activity can exist while still costing some students far more energy to perceive, navigate, understand or act on. Repeated friction sends a message about who the default user is.

THE STUDENT EXPERIENCE

- “The information exists, but finding and using it takes more effort than learning it.”
- “I have to keep asking for a version I can actually use.”

HOW CAN I DO IT?

- Present essential information in more than one way where appropriate.
- Ensure recordings and key media are captioned and navigable.
- Describe important visuals or demonstrate how to interpret them.

EXAMPLE IN PRACTICE

A lecturer explains a graph aloud, captions the recording and provides the graph in an accessible digital format.

STARTING POINT TO ADAPT

In this course, we aim to explain important ideas in more than one mode where this supports the learning outcome. If the way a class or learning activity is organised makes it harder for you to participate or understand what…
