Embedding language support in courses

Is language support built into the course?

LANGUAGE / CURRICULUM

ONE-PAGE TEACHING GUIDE

WHAT IS IT?

Built-in language support (glossaries, worked examples) is available to all, without needing to self-identify

WHY DOES IT MATTER?

University contains many hidden rules: what "critical analysis" means, what a rubric is really asking for, when it is acceptable to ask for help, or what counts as "professional" behaviour. If those rules remain unspoken, familiarity can be mistaken for capability.

THE STUDENT EXPERIENCE

- "Everyone else seems to know rules nobody has explained."
- "I understand the topic, but not what I am being asked to do."

HOW CAN I DO IT?

- Create resources that any student can use without disclosing difficulty.
- Place support at the point of need rather than elsewhere on a separate website.
- Normalise using glossaries, exemplars and worked examples.

EXAMPLE IN PRACTICE

Each weekly module includes a short glossary and one worked example showing how to approach the most demanding task.

STARTING POINT TO ADAPT

This course has been designed to build language and literacy development into the course rather than treating it as remedial support. If you notice an avoidable barrier or an important perspective that is missing, tell us…
