Inclusive learning outcomes

WHAT IS IT?

Do learning outcomes include inclusive capabilities where relevant?

WHY DOES IT MATTER?

Learning outcomes signal what a course regards as important. If capabilities such as working across difference, cultural capability, ethical judgement or communicating with diverse audiences matter in the discipline but remain implicit, they are easy to leave untaught or unassessed.

THE STUDENT EXPERIENCE

- Read the UQ Students as Partners story
- Explore Student Voice at UQ

HOW CAN I DO IT?

- Review the current teaching or assessment design for avoidable barriers.
- Check how students will understand, practise and demonstrate the intended learning.
- Ask students what is working and what needs clarification.

EXAMPLE IN PRACTICE

The Bachelor of Arts developed program learning outcomes aligned to the Graduate Attributes, then mapped core courses to where those outcomes were taught and assessed.

STARTING POINT TO ADAPT

By the end of this course, students will be able to analyse [disciplinary problem] using perspectives from [relevant communities, cultures or knowledge traditions], and explain how those perspectives influence conclusions.
